

A DAY IN THE HEALTHCARE BUSINESS OFFICE

Checks, EFTs, EOBs, ERAs, 835 forms and correspondence arrive in multiple streams, resulting in a jumble of money and data.

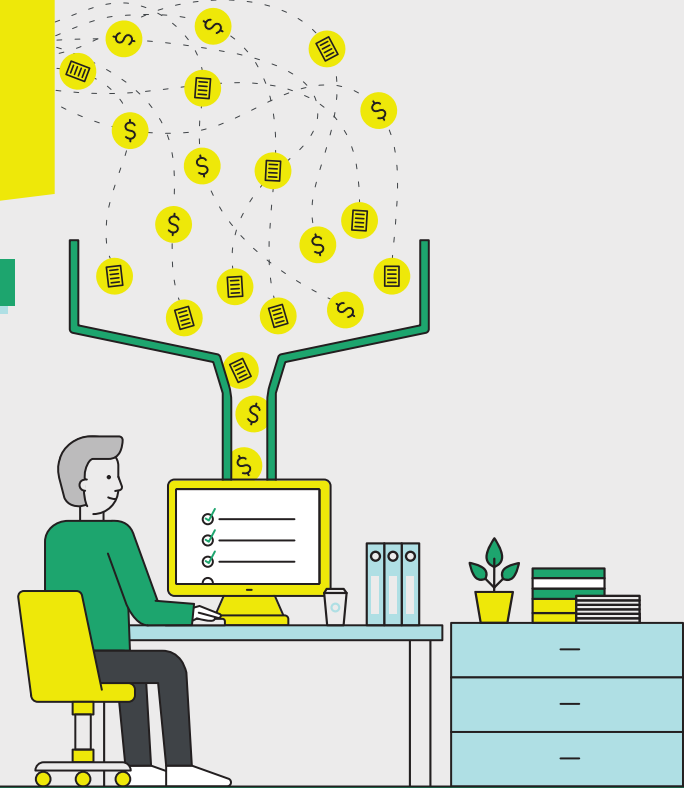

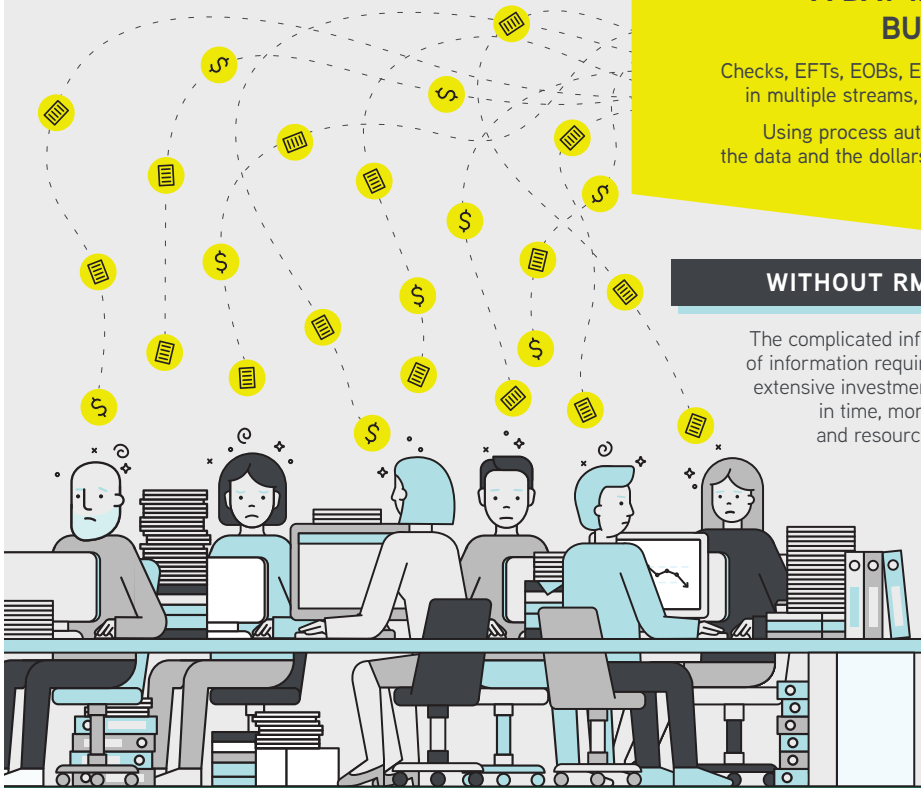

Using process automation technology, RMS consolidates the data and the dollars to deliver a single package of information.

WITHOUT RMS

The complicated influx of information requires extensive investments in time, money and resources.

WITH RMS

The distillation of disparate information into a single digital source means it can easily be stored, sorted and recalled at any time.

SAVE TIME*

86%+ Increase in Posting Efficiency

1min vs. 7min: Average Payment Posting

67%+ Increase in ERA Efficiency

1min vs. 3min: Average Electronic ERA Posting

REDUCE COSTS†

65% Decrease in Cost

\$35K vs. \$100K: Average Labor Costs for Cash Posting/Reconciliation

OPTIMIZE RESOURCES‡

85% Increase in FTE Flexibility

0.2–0.3 vs. 1.9: Average FTEs Needed for Cash Posting/Reconciliation

Streamline the Revenue Cycle

Process automation technology lets you work smarter, not harder.

Managing the healthcare revenue cycle involves a complex series of steps—including processing electronic remittance advice (ERAs), interpreting data and filing information—and that's just the start. Accomplishing this can be clumsy and inefficient, requiring manual data entry that leads to errors and lost time. RMS automates the complex, time-consuming remittance process so that your team can focus on other tasks. With RMS, you can accelerate the revenue cycle, decrease costs and save days in accounts receivable.

This Is Expertise, Electronified.

Built on the industry's most comprehensive payer information database, RMS combines more than 100 years of expertise in technology and software development with healthcare remittance processing to create our best-in-class automation solution.
